

Stroke Solution

Stroke is the leading cause of long-term disability and the fifth leading cause of death in the U.S.¹ With the incidence of stroke projected to rise rapidly during the years ahead,² enhancing stroke care services has become an urgent priority for healthcare providers like you. By extending the regional presence of stroke centers, telestroke networks can facilitate improved stroke outcomes by increasing access to specialized care.

The Opportunity

Telestroke networks have been shown to significantly benefit both patients and providers by creating real-time remote access to acute care services.

Elevate your brand with next generation technology:

Build your regional presence and extend telestroke in outlying hospitals.

Virtualize and scale care delivery:

Enable immediate access to stroke specialists to drive adherence to stroke treatment best practices.

Treat patients in the appropriate setting:

Streamlined triage can facilitate transferring highly acute patients to specialty centers while allowing others to be treated in community hospitals.

As the pioneer of telestroke, we tackled the hardest challenge first, helping health systems like yours increase speed to care for time-critical stroke patients.

The Stroke Solution improves access to specialists and offers your care team one platform to deliver life-saving care.

Improve outcomes

Reduce door-to-needle times and increase tPA delivery by putting stroke neurologists in front of patients when time is critical.

Increase access to care

Create a hub-and-spoke network to leverage your own neurologists or use our credentialed physicians to improve coverage.

Trusted by the world's best

Used at more than 800 sites in the U.S., our Stroke Solution is proven to drive meaningful results.

Built on Solo™

Built on our cloud-based network and with simplicity at its core, Solo is our next generation software platform that creates a seamless experience across web, mobile, or desktop. As the backbone of healthcare's first fully integrated virtual care platform, Solo enables modules like documentation, diagnostic quality image viewing, and analytics so you can create a solution that works for you.

Smart Notes

Document your telehealth consults with customizable, provider validated applications.

Analytics

Collect data to discover actionable insights and drive measurable results.

Imaging

Leverage the power of a diagnostic-quality imaging viewer to deliver comprehensive care.

Devices

Facilitate virtual care when and where you need it with purpose-built telehealth devices for both high and low-acuity environments.

Teladoc Health Drives Results

These are just some of the results our customers have experienced when leveraging the Stroke Solution.
